DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (pages 3-5), filed 11/5/2007, with respect to rejection of claims 1-30 and the objection to the drawings have been fully considered and are persuasive. The rejection of claims 1-30 and the objection to the drawings have been withdrawn.

Allowable Subject Matter

2. Claims 1-30 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* The specification has been amended to include the claim subject matters to overcome the rejection under 35 U.S.C. 112, first paragraph;

* The present invention provides a new apparatus and method for color compression, which prevent shifts on each gradation and which are capable of reproducing each gradation properly (specification, page 6, lines 11-15).

Particularly, the new apparatus and method comprise the following features, which the prior art taken either singly or in combination does not teach:

- an input portion... in a predetermined input-end gamut; and a color compression portion... in a predetermined output-end gamut (see independent claims 1, 8, 16, and 23).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
